PURE STORAGE POWERS HYBRID CLOUD

On-demand Microsoft Azure cloud compute with all-flash smart storage

ON-DEMAND COMPUTE

Get flexible infrastructure for occasional compute requirements

SECURE DATA

Data remains encrypted and private, with a secure cloud connection

ALL-FLASH CLOUD

Smart storage is effortless, efficient and evergreen for your most demanding applications

COMPUTE FLEXIBILITY AND DATA SECURITY

Why purchase excess capacity infrastructure that you may rarely use? For many enterprises, computing needs change, as does budget, so why not purchase compute resources as you need them?

Pure Storage and Microsoft Azure have partnered to provide a hybrid cloud solution for workloads requiring high-performance smart storage and cloud burst compute. Get the agility and flexibility of cloud compute, but keep your data private — in secure, high-performance all-flash storage. No need to invest in additional fixed compute infrastructure!

For those enterprises with strict data security, governance, and compliance requirements, hybrid cloud is win-win: maintain control of your data with private, encrypted storage while leveraging cloud-scale computing resources as needed.

TAKE THE EXPRESSROUTE

Connectivity between your storage (on-premises or at a cloud exchange co-location facility) and Microsoft Azure is provided by Microsoft Azure ExpressRoute. All connections are low-latency and secure. Depending on your connectivity model (Exchange Provider or Network Service Provider), you'll have a variety of dedicated, high-bandwidth options — up to 10 GB/s — to choose from.

AUTOMATE EVERYTHING

Your Pure Storage hybrid cloud deployment can be fully automated with Pure Storage Open Connect for Hybrid Cloud. From easy configuration to simplified provisioning, you're Azure hybrid cloud setup experience will be fast, resilient, and seamless.

SMART STORAGE FOR CLOUD IT

A Pure Storage hybrid cloud solution gives you much more than just access to on-demand cloud compute. You get Smart Storage – effortless, efficient, and evergreen – from your all-flash infrastructure.

YOUR STORAGE EXPERIENCE WILL BE EFFORTLESS

Pure Storage solutions are always-on, and always fast, with greater than 99.999% availability, and 100% performance through upgrades, maintenance, and failures. They're self-managing and plug-n-play, meaning you'll be up and running in less than an hour, and your management will be so easy and seamless you may forget that you even have storage to manage. This is storage that just works.

EFFICIENT LIKE YOU WON'T BELIEVE

Consolidate and accelerate all your key applications with all-flash performance on 10x less space – and, with our industry-leading data reduction, 10x less flash. Get built-in, zero compromise enterprise data services: encryption, QoS, snapshots, replication, and data migration. Everything is included, at no extra charge, and everything is full automatable and open platform.

YOUR STORAGE, EVERGREEN

We deliver storage that you buy once and see improve for a decade or more – upgrading and expanding according to your needs, with no disruptions and no data migrations. Think of it as a subscription to our continuous innovations.

PURE STORAGE HYBRID CLOUD

Experience secure, high-performance smart storage with on-demand cloud compute.
